PROFESSIONAL SUMMARY

Full Stack Python Developer and Software Developer with hands-on experience in Python, Django, HTML, CSS, JavaScript, SQL/MySQL, Git, and GitHub, supported by strong foundations in OOP, DSA, and software development. Experienced in building web applications, interactive dashboards, AI applications, and data-processing solutions. Strong problem-solving, debugging, teamwork, and communication skills with a focus on developing scalable, user-focused applications.

TECHNICAL SKILLS

Programming	Python, Core Java, C, C++, SQL
Frontend	HTML5, CSS3, JavaScript, Responsive Web Design, DOM, Form Validation
Backend	Django, Django REST Framework (DRF), REST APIs, API Integration
Databases	MySQL, SQL, Database Design, CRUD Operations
Python Development	OOP, Exception Handling, File Handling, Modules & Packages, Virtual Environments
Machine Learning	Scikit-learn, Pandas, NumPy, Classification, Regression, NLP, TF-IDF
Tools	Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Kaggle
Core CS	Data Structures & Algorithms, OOP, Debugging, Problem Solving
Professional	Team Leadership, Critical Thinking, Technical Communication, Adaptability, Agile Collaboration

WORK EXPERIENCE

Machine Learning Engineer Intern | CodeSoft Infotech, Meerut, UP

- Engineered an end-to-end Customer Churn Classification pipeline using Python, Pandas, NumPy, and Scikit-learn; performed EDA, categorical encoding, and hyperparameter tuning.
- Evaluated models using Precision, Recall, F1-score, and ROC-AUC; developed an NLP-based Movie Genre Prediction system using text preprocessing and TF-IDF.

Machine Learning Engineer Intern | Cognizant, Meerut, UP

- Built a Credit Card Fraud Detection model with Python and Scikit-learn using class-imbalance techniques to improve anomaly detection.
- Trained Logistic Regression, Decision Tree, and Random Forest models using ROC-AUC and F1-score; developed an Employee Salary Regression model using feature engineering and categorical encoding.

FEATURED PROJECTS

Job Application Tracker | Python, Django, Django REST Framework, MySQL, HTML, CSS, JavaScript

Developed a full-stack application to manage job applications, interview stages, deadlines, and application status. Implemented Django models, CRUD operations, REST APIs, authentication, search/filter functionality, and an interactive dashboard.

Personal Expense & Budget Manager | Python, Django, MySQL, HTML, CSS, JavaScript

Developed a web application for recording expenses, managing categories and monthly budgets, and monitoring spending. Implemented authentication, CRUD operations, REST API integration, database persistence, and dashboard-based expense tracking.

Naivya AI Chatbot | Python, AI, VS Code

Built a conversational application implementing natural-language parsing logic for interactive dialogue handling.

AI-Based Drop-out Prediction & Counselling Dashboard | HTML, CSS, JavaScript, Web Integration

Designed and implemented an interactive student analytics dashboard with automated feedback integration to identify and counsel at-risk students.

Credit Card Fraud Detection System | Python, Scikit-learn, Pandas, NumPy, Jupyter Notebook

Applied SMOTE class-imbalance techniques and trained Random Forest and Logistic Regression models to detect anomalous transactions efficiently.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Engineering | IIMT Engineering College, Meerut, Uttar Pradesh | **Expected Graduation:** 08/2027

CERTIFICATIONS & ADDITIONAL STRENGTHS

Certifications: Python Programming, Machine Learning with Python, Generative AI

Core Competencies: Advanced Problem Solving, Team Leadership, DSA, OOP Concepts, System Debugging

Languages: English, Hindi, Spanish | **Honors & Awards:** District Chess Award, Music Award
